

Tashini Hendahewa

BEng (Hons) Software Engineering

(+94) 76 44 67 569 | Rajagiriya, Sri Lanka | tashini.maleesha@gmail.com | linkedin.com/in/tashini-maleesha-133176234 | github.com/Tash2001

Software Engineer with over a year of professional experience building full-stack web and desktop applications across government, financial, and business-automation sectors. Skilled in React.js, Spring Boot, Node.js, and FastAPI, with hands-on experience in database design, and Power BI dashboarding. Strong foundation in machine learning, cybersecurity, and agile delivery, backed by a BEng (Hons) in Software Engineering.

EXPERIENCE

Arvutt Pvt. Ltd: Associate Software Engineer | *July 2025 - Present*

- Build and maintain full-stack web and desktop applications for clients across a range of industries.
- Develop responsive, user-facing web interfaces with React.js, JavaScript, and HTML/CSS, backed by Spring Boot services.
- Build cross-platform desktop tools using Electron.js and FastAPI to automate internal business workflows.
- Design and maintain SQL and NoSQL database structures to keep applications reliable and data consistent.
- Test and debug application features to improve performance, usability, and overall code quality.
- Clean and transform raw transactional data into star-schema models using MySQL and Power Query, then build interactive Power BI dashboards from the results.

Key Projects:

- **Inventory and Order Management System —** Built an inventory, and order management platform using React.js, NodeJS, and PostgreSQL, automating stock management, supplier tracking, and invoice generation.
- **Labor Tracker—** Designed a value added services labor tracker using React.js and FastAPI log high-value secondary processing tasks.
- **Warehouse Pick & Efficiency Tracker—** Developed a performance monitoring system using React.js , Spring Boot and MySQL to track pick rates and to monitor item movement efficiency.
- **Client Dashboards —** Developed Logistics, Customer Acknowledgment, and SLA dashboards using Power BI and SQL.

Epic Lanka Pvt. Ltd: Software Engineering Intern | *July 2023 - July 2024*

- Worked on full-stack development of enterprise-grade systems in the government and financial sectors.
- Collaborated in agile teams to deliver secure, scalable, and modular software solutions.

Key Projects:

- **Document Management System | Parliament of Sri Lanka —** Developed a centralized system for secure document storage, retrieval, and management. Implemented frontend components using React TypeScript and built backend services with Spring Boot, integrated with SQL databases via Workbench for optimized data operations.
- **Card Management System | Paytect Product —** Contributed to Paytect, a comprehensive card issuing and merchant acquiring platform used by financial institutions. Assisted in developing modules for card application processing, personalization, and fraud detection, using React.js, Spring Boot microservices, and Oracle for transaction data management. Participated in agile development using Jira for issue tracking and sprint planning.

EDUCATION

- **BEng (Hons) Software Engineering —** University of Westminster | Upper Second Class Honours | 2021 - 2025
- **GCE Advanced Level —** Dharmasoka College, Ambalangoda | Chemistry (C), Physics (C), Mathematics (B) | 2020
- **GCE Ordinary Level —** Dharmasoka College, Ambalangoda | 8A Passes | 2017

SOFTWARE PROJECTS

Personal Website

- https://tash2001.github.io/portfolio

Machine Learning & AI Projects

- **FabricGuard – Automated Fabric Quality Assessment System (2024–2025) —** Developed an AI-based system for fabric defect detection and texture analysis using transfer learning (EfficientNetB3 with SE Block) and handcrafted texture features. Built a responsive PWA with a FastAPI backend and PostgreSQL database for real-time inference and report generation.
- **Beam Load Analyzer (2022–2023, Group) —** Built a mobile app that scans hand-drawn beam diagrams and analyzes structural loads using image processing, Flutter UI, Firebase, and a Python backend.

Software Development Projects

- **Inventory and Billing System (2026) —** Developed an inventory and billing management system using FastAPI, React.js, ElectronJS and SQLite, supporting product management, billing operations, and data storage.
- **RestCountries Middleware API System (2025) —** Developed a secure middleware application using Node.js and Express.js integrating with the RestCountries API, with JWT-based authentication, role-based API key management, SQLite storage, and Docker containerization.
- **TravelTales – Country Blog Platform (2025) —** Developed a full-stack blogging platform for publishing travel stories, with following, likes, comments, and search. Built on a secure Dockerized microservices architecture using Node.js, Express.js, SQLite, and JWT authentication.
- **Merchant Management System (2023) —** Developed a full-stack web application for managing merchant profiles with secure authentication and CRUD operations, using Spring Boot, Angular, and MySQL via RESTful APIs.
- **Student Management System (2023) —** Developed a web-based student management system for handling student information, academic records, and course registrations using Spring Boot, JSP, and MySQL.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, PHP, R
- **Frontend Technologies:** React, TypeScript, Angular, JSP, jQuery, Bootstrap, HTML, CSS
- **Backend Technologies:** Spring Boot, Spring MVC, Node.js, Express.js, FastAPI
- **Databases:** MySQL, PostgreSQL, Oracle, SQLite
- **Cloud & DevOps:** Docker, Git, Jira, RESTful APIs, Microservices
- **Tools & Software:** Excel, Power BI, Power Query, Firebase, Electron.js
- **Specializations:** Machine Learning, Cybersecurity, Database Management, Testing, Debugging

COMPETITIONS & HACKATHONS

- **Code Sprint 7.0 (2023) —** Finalist team member, IdeaSprint (Phase 1), organized by IEEE of the Informatics Institute of Technology.
- **Microsoft Imagine Cup (2023) —** Developed an innovative tech-based solution for global competition.

EXTRACURRICULAR ACTIVITIES

- Member, Rotaract Club of Informatics Institute of Technology (2022–2025).
- Member, School Badminton Team (2013–2015).
- Swimming enthusiast, hackathon and competitive coding enthusiast.
